DETAILED ACTION

Claim Objections

1. Claims 2-4 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claims 2-4 do not limit the parent claim since they claim all conceivable alternatives. Therefore, anything that reads upon claim 1 will inherently read upon claims 2-4.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the braking layer" in line 5 of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Byrnes et al (U. S. Patent no. 5,449,152).

External frame 4,13, rod 2,12, braking layer 5,14

6. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Thiry (U. S. Patent no. 2,716,566).

External frame 5, rod 3, braking layer 7

7. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Lamprey (U. S. Patent no. 3,545,737).

External frame 10, rod 12, braking layer 11
